KEEP OUT OF REACH OF CHILDREN

zelam

burnout™

Herbicide Adjuvant

**A special purpose adjuvant for use with
glyphosate herbicides to give improved
rainfastness and rapid burnout**

A D D I T I V E

NET CONTENTS: 5 LITRES

™ Trademark of Tapuae Partnership, NZ.

PLEASE READ ENTIRE LABEL BEFORE MIXING OR APPLYING.

ACTIVE INGREDIENT: Adjuvant containing 36g/litre oxyfluorfen plus activators and penetrants in the form of a non-volatile emulsifiable concentrate.

TOXICITY: Warning: May cause organ damage from repeated oral exposure at high doses.

FIRST AID: If swallowed do not induce vomiting. For advice contact the National Poisons Centre 0800 POISON (0800 764 766) or a doctor immediately. If skin contact occurs, remove contaminated clothing and flush skin with running water for at least 15 minutes. If splashed in eyes, wash out immediately with water.

PERSONAL PROTECTION: When mixing or applying wear eye protection, chemical resistant gloves, boots and cotton overalls. Wash protective clothing daily after work.

ECOTOXICITY: Warning - toxic to aquatic organisms with long lasting effects. Avoid contamination of any water supply with product or empty container. Very toxic to earthworms.

STORAGE: Store in original container, tightly closed, away from foodstuffs. When stored appropriately, this product should show no significant degradation for 2 years from the date of manufacture. Contact your supplier for further information about the use of any product that is older than this.

DISPOSAL: For containers of 20 litres or less, triple rinse container and add residue to spray tank. Burn in an appropriate incinerator, if circumstances such as wind direction permit. Otherwise crush or puncture and bury in a suitable landfill. Avoid contamination of any water supply or stream with product or empty container.

MATERIAL SAFETY DATA SHEET: Additional information is listed in the MSDS available from Zelam Limited or www.zelam.com

NOTE TO BUYER: The manufacturer and vendors of **Burnout™** warrant the formulation to contain the specified active ingredient within accepted tolerance but make no warranty of any kind on the uses of material and accept no responsibility, whether the material is used in accordance with the label directions or not.

DIRECTIONS FOR USE:

FOR USE WITH GLYPHOSATE HERBICIDES:

SITUATION	APPLICATION RATES			DIRECTIONS
	Boom	Handgun	Knapsack	
Pre-planting or pre-crop emergence use in vegetables (broccoli, cabbage, cauliflower) except onions and pre-crop emergence use in potatoes	500ml/ha	-	1.0ml/litre	Use with recommended label rates of glyphosate. Do not exceed 500ml/ha. Do not use pre-plant as well as pre-emergent to any one crop. WARNING: Testing for crop safety must be carried out before any large scale use is carried out. Do not use pre-plant or pre-emergent to onions as too many factors affect selectivity for consistent crop safety.
All other uses except pre-harvest in cereal crops	500ml-1 litre/ha	50-100ml/100 litres	1.0ml/litre	For use with recommended label rates of glyphosate to achieve faster chemical effect, improve rainfastness and enhance efficacy. Use the higher rate on large, older weeds. Not recommended as a replacement for organo-silicone additives as stated on glyphosate labels for control of brushweeds, bracken, brambles and other perennial weeds.

FOR USE WITH TERB 500™:

SITUATION	APPLICATION RATES		DIRECTIONS
	Boom/Aerial	Knapsack	
Forestry - tree release, gorse, broom, sorrel	1.0litres/ha	1ml/10m ²	Add Burnout™ to the recommended rate of Terb 500™ to assist control and improve overall speed and kill of weeds.

MODE OF ACTION: **Burnout™** assists the wetting and penetration of the companion herbicide through the waxy cuticle of the weed.

NOTE: When used as directed with the recommended label rates of glyphosate herbicides initial brownout on most weeds and stems is within 3-7 days of application. Some weeds and certain grasses may not show an initial scorch but earlier kill is generally obtained. Not recommended for use with glyphosate to control brushweeds, bracken, brambles and other perennial weeds.

GENERAL: Most effective on small activity growing weeds and not recommended for use on woody weeds or old mature plants.

CAUTION: Do not use with selective herbicides unless recommended on the label, as selectivity may be reduced or lost. Do not use with fungicides, insecticides or plant growth regulators as damage to the plant will occur.

RAINFALL: The rapid penetration of **Burnout™** improves rainfastness without affecting the translocation of the herbicide. The rainfree period for glyphosate will be reduced to 30-60 minutes.

COMPATIBILITY: Use only with products recommended.

APPLICATION: Follow instructions for companion herbicide.
