# PLEASE READ ENTIRE LABEL CAREFULLY BEFORE MIXING OR USE SHAKE WELL BEFORE USE

**Hazard Classification: 6.4A, 6.8B, 6.9B, 9.1C**

**WARNING:** May cause eye irritation, avoid contact with the eyes. May cause reproductive/development damage or organ damage from repeated oral exposure at high doses.

**FIRST AID:** If swallowed **DO NOT** induce vomiting. For advice contact the National Poisons Centre 0800 POISON (0800 764 766) or a doctor immediately. If skin or hair contact occurs, remove contaminated clothing and flush skin and hair with running water. Do not scrub the skin. If splashed in eyes, wash out immediately with water for at least 15 minutes. If inhaled move the victim to fresh air immediately. Begin artificial respiration if breathing has stopped.

**PERSONAL PROTECTION:** When mixing or applying wear eye protection, chemical resistant gloves, boots and cotton overalls. Ensure adequate ventilation when handling concentrate. Do not eat, drink or smoke while using. Remove protective clothing and wash hands and face thoroughly before meals and after work. Wash protective clothing daily after work.

**ECOTOXIC:** Harmful to aquatic organisms with long lasting effects. Avoid contamination of any water supply with product or empty container.

**STORAGE:** Store in original container, tightly closed, away from feed and foodstuffs.

**DISPOSAL:** Triple rinse container and add residue to spray tank. Dispose of container at an approved landfill or AgRecovery Depot. Avoid contamination of any water supply with product or empty container.

**APPLICATION:** Rates provided are for dilute spraying only. For concentrate spraying adjust rates accordingly.

**It is an offence to use this product on animals.**

CROP	RATE	DIRECTIONS FOR USE
<b>PIPFUIT</b> Black-Spot and Powdery Mildew	40ml per 100 litres of water	Apply <b>Pipstar encaps</b> mixed with a suitable protectant, as a high volume dilute application at 7-10 day intervals, commencing at cluster stage.  For concentrate spraying adjust dilution rates accordingly.  During severe periods of black spot infection ("Mills Periods"), re-apply <b>Pipstar encaps</b> within 4 days of rainfall

**RESISTANCE:** Resistance to this fungicide and related DMI products could develop in some disease situations from repeated use. To minimise this risk use strictly in accordance with the label instructions. Always mix with a blackspot protectant spray. Do not use more than 4 applications during a season.

**It is an offence for users of this product to cause residues exceeding the relevant MRL in the New Zealand Food Standards.**

**WITHHOLDING PERIOD:** Apples - Do not apply within 35 days of harvest.

**RAINFALL:** Rain within 1 hour following treatment may reduce effectiveness.

**COMPATIBILITY:** May be tank mixed with commonly used fungicides and insecticides except for highly alkaline materials such as Bordeaux mixture or lime sulphur. Do not tank mix with dichlofluanid.

**SHELF LIFE:** When stored appropriately, this product should show no significant degradation for 2 years from the date of manufacture. Contact your supplier for further information about the use of any product that is older than this.

**MATERIAL SAFETY DATA SHEET:** Additional information is listed in the Material Safety Data Sheet available from Zelam Ltd or [www.zelam.com](http://www.zelam.com)

**ERMA NEW ZEALAND:** Additional information is available from the ERMA NZ website - [www.ermanz.govt.nz](http://www.ermanz.govt.nz). Approval Code: HSR001723.

**NOTICE TO BUYER:** The manufacturer and vendors of **Pipstar encaps**™ warrant the formulation to contain the specified active ingredient within accepted tolerance but make no warranty of any kind on the uses of material and accept no responsibility, whether the material is used in accordance with the label directions or not.
