PLEASE READ THE ENTIRE LABEL BEFORE USE

ACTIVE INGREDIENT: Contains 500g/litre prometryn in the form of a suspension concentrate.

APPROVED HANDLER: This product must be under the control of an approved handler during use.

RECORDS: Records of use must be kept under certain circumstances - see MSDS for details.

WARNING May be harmful if swallowed, inhaled or absorbed through the skin. May cause skin sensitisation from prolonged skin contact. May cause organ damage from prolonged oral exposure at high doses.

FIRST AID: If swallowed DO NOT induce vomiting. For advice contact the National Poisons Centre 0800 POISON (0800 764 766) or a doctor immediately. If skin or hair contact occurs, remove contaminated clothing and flush skin and hair with running water. DO NOT scrub the skin. If splashed in eyes, wash out immediately with water for at least 15 minutes. If inhaled move the victim to fresh air immediately. Begin artificial respiration if breathing has stopped.

PERSONAL PROTECTION: Avoid contact with skin or inhalation of spray mist. Gloves should be worn at all times. Wear eye protection when handling the concentrate. Ensure adequate ventilation when handling the concentrate. Remove protective clothing and wash hands and face thoroughly before meals and after work. Wash protective clothing daily after work. Do not eat, drink or smoke while using this product.

ECOTOXIC: Very toxic to aquatic organisms. Avoid contamination of any water supply with chemical or empty container. Very toxic to the soil environment. Not toxic to earthworms.

STORAGE: Store in original container, tightly closed, away from foodstuffs. Keep out of reach of children.

SHELF LIFE: When stored appropriately, this product should show no significant degradation for 2 years from the date of manufacture. Contact your supplier for further information about the use of any product that is older than this.

DISPOSAL: For containers of 20 litres or less, rinse container until wash water is clear. Dispose of container at an approved landfill or other approved facility. Avoid contamination of any water supply, stream, etc.

MATERIAL SAFETY DATA SHEET: Additional information is listed in the MSDS available from Zelam Ltd or www.zelam.co.nz.

ERMA NEW ZEALAND: Additional information is available from the ERMA NZ website - www.ermanz.govt.nz. Approval Code: HSR000559

NOTICE TO BUYER: The manufacturer and vendors of Prominent warrant the formulation to contain the specified active ingredient within accepted tolerance but make no warranty of any kind on the uses of material and accept no responsibility, whether the material is used in accordance with the label directions or not.

USES	RATES	DIRECTIONS
Carrots & Parsnips	1.5 - 2 litres/200-300 litres water/ha	Apply when the crop has at least 2 true leaves and weeds are still small.
Onions	650-700mls/350-450 litres water/ha	Apply when the crop has at least 2 true leaves. Further applications of 0.75-1 litre / 200-450 litres water/ha can be made to control later germinating weeds. Important: Do not use within 1 week of fungicide or insecticide sprays as crop damage may occur.
Peas- process, garden & partridge	1 litre/200-300 litres water/ha	Apply when the crop is 5-8cm high (3-5 nodes). Peas should be disease free, growing in moist soil and foliage should be dry. Do not treat peas that are more than 10cm high. After heavy rain, allow 2 days drying before spraying. Caution: To avoid crop damage, do not exceed the recommended label rate and avoid excessive overlapping.
Potatoes	2 litres/200-300 litres water/ha	Apply to mounded potatoes when the crop is just emerging and the weeds are still small. The use of 2 nozzles per row across the mound will give improved coverage and weed control.

MODE OF ACTION: Rapidly absorbed by foliage and also by roots following rain or irrigation. Translocates from roots to the growing point where it inhibits photosynthesis. Solubility in water is 48 ppm.

RAINFALL: Rain within 6 hours following treatment may reduce foliar activity. Rain subsequent to this will aid results.

SURFACTANT: Prominent* contains surfactant and the addition of further wetting agent must be avoided as this will increase the risk of crop damage.

APPLICATION: Apply through any boom spraying equipment, but do not use strainers finer than 300 microns. Avoid excessive overlapping. Maintain agitation throughout spraying.

SPRAYER CLEAN-UP: To avoid injury to subsequently sprayed sensitive crops, thoroughly clean sprayer with several flushes of clean water.
