

ECOTOXIC

KEEP OUT OF REACH OF CHILDREN

OxyTM
250 SC

HERBICIDE

Contains: 250g/litre oxyfluorfen in the form of a suspension concentrate

Controls broadleaf weeds and annual grass in orchards, vineyards, onions, vegetable brassicas and forest nurseries.

NET CONTENTS: 5 LITRES

TMTrademark of Tapuae Partnership, NZ. Registered pursuant to the ACVM Act 1997, No. P005875. See www.foodsafety.govt.nz for registration conditions.

ZELAM LIMITED

PLEASE READ ENTIRE LABEL BEFORE USE. SHAKE OR STIR WELL BEFORE USE.

For containers over 20 litres, stir well before use by recirculation or mechanical stirring.

HAZARD CLASSIFICATION: 6.3B, 6.4A, 6.9B, 9.1B, 9.2A

APPROVED HANDLER: This product must be under the control of an approved handler during use. See MSDS for full details.

RECORDS: Records of use must be kept under certain circumstances. See MSDS for full details.

WARNING: May cause skin and eye irritation from prolonged skin contact. Avoid contact with eyes and skin. May cause liver damage from repeated oral exposure at high doses.

FIRST AID: If swallowed DO NOT induce vomiting. For advice contact the National Poisons Centre 0800 POISON (0800 764 766) or a doctor immediately. If skin or hair contact occurs, remove contaminated clothing and flush skin and hair with running water. DO NOT scrub the skin. If splashed in eyes, wash out immediately with water for at least 15 minutes. If inhaled move the victim to fresh air immediately. Begin artificial respiration if breathing has stopped

PERSONAL PROTECTION: Avoid contact with skin or inhalation of spray mist. Ensure adequate ventilation when handling concentrate. Wear eye protection when handling the concentrate. Gloves should be worn at all times. Wash thoroughly after use and before eating.

ECOTOXIC: Toxic to aquatic organisms. Avoid contamination of any water supply with chemical or empty container. Very toxic to the soil environment.

STORAGE: Store in original container, tightly closed, away from foodstuffs.

SHELF LIFE: When stored appropriately, this product should show no significant degradation for 2 years from the date of manufacture. Contact your supplier for further information about the use of any product that is older than this.

DISPOSAL: For containers of 20 litres or less, triple rinse container and add residue to working tank. Dispose of container at an approved landfill or AgRecovery Depot. Avoid contamination of any water supply, stream, etc.

MATERIAL SAFETY DATA SHEET: Additional information is listed in the MSDS available from Zelam Limited or www.zelam.com

EPA NEW ZEALAND: Additional information is available from the EPA NZ website - www.epa.govt.nz. Approval Code: HSR000543.

DIRECTIONS FOR USE:

WEEDS CONTROLLED: Black nightshade, cleavers, fathen (partial control), field bindweed, fumitory, groundsel, redroot, sea radish, seedling docks, sow thistle, speedwells, twin cress, wild turnip, wireweed & wild portulaca.

CROP/SITUATION	RATES	CRITICAL COMMENTS
Pipfruit, Stonefruit, Kiwifruit and Grapevines. Residual weed control	6 litres/ha in 300-400 litres of water	Apply to bare ground when trees and vines are dormant. Do not use near newly grafted or budded cuttings or plants less than 1 year old. Treatment should be made when the soil is moist and weeds are small.
Onions Post emergence	240-480 ml/ha in 300-400 litres of water	Apply to a weed free soil once onions have two true leaves. Use the low rate when onions are small and conditions are wet and cold. Repeat applications at 4-6 week intervals as required. Treat any weed escapes with suitable contact herbicides if required. The higher rate can be used once onions have three true leaves. Do not use more than 1.9 litres/ha per crop.
Vegetable Brassicas: Cabbage, Cauliflower, Broccoli and Broccoflower	800ml - 1.6 litres/ha in 300-400 litres of water	Apply immediately after transplanting to a weed free soil. Oxy250 SC may be applied directly after irrigating the newly transplanted crop. Some leaf burning may occur in mid winter, but this is short lived and does not affect yield. Note: Under cool humid conditions, some varieties of broccoli may be damaged resulting in yield reductions. Use the lower rate under cold wet conditions (midwinter) or on medium soils and the higher rate in warm weather (summer) on heavy soils. Make only one application per crop.
Forest Nurseries Pre emergence treatment	2-4 litres/ha 0.5-1 litre/ha in 300-400 litres of water	Pinus and Cupressus species: Eucalyptus and Racosperma (<i>Acacia</i>) species: Can inhibit height growth in some Eucalyptus and Racosperma species. Apply to clean seedbeds immediately after sowing but prior to any emergence of seedlings.
	2-4 litres/ha in 300-400 litres of water	To achieve best control weeds should be no more than 5 cm in height. Apply no sooner than 5 weeks after seedling emergence. Foliage discolouration can occur to Eucalyptus, <i>Cupressus</i> and Radiata Pine seedlings.

It is an offence for users of this product to cause residues exceeding the relevant MRL in the New Zealand (Maximum Residue Limits of Agricultural Compounds) Food Standards.

WITHOLDING PERIOD: Onions - 6 weeks.

APPLICATION: Apply with conventional equipment. DO NOT add any wetting agent.

COMPATIBILITY: May be tank mixed with a wide range of herbicides including glyphosate and paraquat.

NOTICE TO BUYER: The manufacturers and vendors of Oxy250 SC warrant the formulation to contain the specified active ingredient within accepted tolerance when packed but make no warranty of any kind on the use of this material and accept no responsibility for results, whether the material has been used in accordance with directions or not.
